Tampa, FL 33607

Technology is rapidly expanding and changing today's business environment. Companies need the ability to quickly im-

plement the best computing and networking solution, no matter where it comes from. Doing so can be a demanding task for most businesses. By the time they develop the skills to implement a managed computing networking system, their business processes and the software to run them, may be obsolete.

Why not choose a partner to help you achieve that goal successfully? Whether installing a new managed network infrastructure or upgrading your current computing environment, Riley Technology Solutions (RTS) has the experience and the expertise to help your company stay ahead of the competition and grow within your industry. RTS is a Florida based company with service capabilities that extend throughout the United States.

Our computing and network management capabilities are built upon twenty years of high tech industry expertise. We manage computing and networking infrastructures by integrating a wide array of advanced technologies—including Desktop, PC Notebooks, Software Applications, Servers, Storage, Data, Voice, Video, Wireless, E-mail, and Voice-messaging—into a powerful, unified fabric that raises computing network performance, reduces operating costs, and transforms how clients do business.

Why RTS

RTS is uniquely qualified to deliver instant access to all the elements needed to support complex computing and network environments. We offer seamless services that respond to mission-critical business imperatives and bring the computing networking future into business today. We assist small, medium or large business to leverage their exiting or new computing, software application and/or network management infrastructure.

Our Client Advantages and Benefits include:

- ✓ Reduced Total IT Spending
- ✓ Optimized Use of your IT Assets
- ✓ Consistent Service Delivery
- ✓ Long-term Clients Satisfaction
- ✓ Streamlined Technical Architecture and Third Party Vendors
- ✓ An infrastructure that provide users, suppliers, clients, and potential clients the ability to conduct electronic commerce anywhere in the world, 24 hours a day, 365 days a year.

Service Capabilities

RTS assists clients in both industry and government to achieve strategic and operational results through the use of computer, software application and networking technology.

By gaining an understanding of our client's business needs, we can develop a total solution that delivers results. Our company's success is based on collaboratively working with our clients to develop innovative technology strategies and solutions that address specific technology business challenges.

Our project consultants fit well into any organization whether they have total project responsibility; become part of a project management team; or oversee a project that is off track.

We are committed to:

- Focusing on Your Business Needs
- Driving Growth for Your Business
- Delivering Value by Linking our Work and Resources
- Doing It Once, and Doing It Right.

When addressing the market for managed enterprise solutions, RTS offers a comprehensive set of managed services that will enhance and simplify your business requirements. Our managed service offerings will provide reliability, security, and performance – along with scalability, and value.

We offer a suite of managed services which include:

- Managed Security Services
- Managed Storage Services
- Managed Network Services
- Managed Data Network Services
- Networking Professional Services
- Managed Business Continuity Services
- Networking Computing and Data Solutions.
